Are you looking for new ways to collect data, find data, and share your spatial story? New geospatial apps and resources are being developed all the time, and it can be hard to keep up. In this presentation learn about some handy geospatial resources that you can put into action for work, class, or just for fun!

Elizabeth Tulanowski is a GIS Instructor in the Warner College of Natural Resources and the Education Coordinator for the Centroid. She has 22 years of GIS experience including data collection, analysis, and visualization, and is excited to share some of these fun technologies with the audience.
